THE LEADING EDGE IN AGGREGATES

- UK's largest independent specialised aggregate suppliers*
- World wide service and delivery network*
- Wider range of landscaping products*
- Wider range of specialised industrial minerals*
- Wider range of decorative aggregates*

Our extensive sample library is based at our Arbor Low works site in Derbyshire. It contains hundreds of different types of materials for matching or sampling purposes. Samples are available on request should you wish to see any product prior to placing an order. The photographs featured in this brochure should only be used as a guide.

The aggregates used in the Derbyshire Aggregates range are predominantly naturally occurring minerals which have natural colour variation. While we do everything possible to reduce colour inconsistencies, we cannot guarantee this. Representative samples are available from our head office on request.

Also available from Derbyshire Aggregates Limited are our extensive range of dried, concrete and dashing aggregates.

Also available are:
Dry-Dashing and
Dried Aggregate
Products Brochures
